## CAREER SUMMARY

Result driven Planning Engineer with more than 25 years' experience in Project Controls, Project Engineering for various projects for in the field of Oil & Gas Construction, Commissioning, Maintenance, Shutdowns, Turnarounds and Planning for FPSO Construction.

## EMPLOYMENT EXPERIENCE

**MODEC Offshore Production System (Singapore) Pte. Ltd.** **April 2025 – Present**  
**Position: Offshore Planner**  
**Project: Bacalhau FPSO (MV35) Project**

### 1. Planning Responsibilities

- Updating and Monitoring of EPCI Schedule in MS Project for Client submission.
- Prepare and monitor Look-Ahead schedule that covers Construction and Commissioning activities, Material requirements, Manpower and Mechanical Completion activities.
- Involve in the preparation of Weekly Reports and Monthly Reports.
- Prepare Productivity Analysis report for weekly submission to the Client.
- Coordinate with the Onshore Material Controllers for Offshore material requirement.
- Involve in the preparation of schedule, monitoring and updating for the project's critical activity such as the Flare Tower Support rectification work, which is critical for First Oil Milestone.
- Coordinate with Off shore's Construction Supervisors for progress of all EPCI activities including the COW (Carry Over Works) as well as OWL (Outstanding Work List).
- Prepare the weekly POB report which includes the Manpower and Manhours data included in the Weekly and Monthly reports.
- Update and monitor the Post First Oil Outstanding Worklist by close coordination with the corresponding SRPs on board.
- Prepare, update and monitor the Heat Tracing activities critical achieving the First Oil and First Gas milestones.
- Involve in the updating and monitoring of G07 Systems close-out.
- Coordinate with the Mechanical Completion Coordinator for system close-out required in Master Schedule update.
- Involve in the P91 Joints Rectification schedule preparation and progress monitoring.
- Update and Monitor Construction activities such as Heavy-Duty Handrail Reinforcement work, the Witness Joints progress, Fire Hydrant support installation and Fire Belt and Flange Protection activities.
- Support the Lead Planner in Preparing the Compressor manning and activity schedule critical for First Oil achievement.
- Involve in the updating and monitoring of the GTCC Schedule.
- 

**MODEC Offshore Production System (Singapore) Pte. Ltd.** **April 2024 – April 2025**  
**Position: Senior Planner**  
**Project: Shell Brazil Petroleo Ltda Gato Do Mato (GDM) FPSO Project**

### 1. Planning Responsibilities

- Preparation, Updating and Monitoring of P6 FEED Schedule for Monthly Progress reporting to the Client.

- Coordinate with Lead Engineers the weekly progress of their respective deliverables for weekly progress reporting.
- Prepare and update the FEED Progress S-Curves and Progress Charts of all FEED Engineering deliverables for ELT Meetings, Weekly and Monthly progress reporting.
- Prepare and provide the Engineering look ahead deliverables for both Marine and Topsides (4-Week & 2-Week Lookahead) to ensure targets are met and delays are kept on a minimum.
- Prepare the GAP Analysis for engineering deliverables that get delayed, indicating the reasons for delay and the mitigation steps to address the delays.
- Coordinate with Procurement Team (Engineers and Buyers) for progress update in terms of procurement deliverables such as (RFQ, TBE, CBE) status and targets.
- Prepare the S-Curves for Procurement Progress for RFQ Packages for presentation to the Client.
- Prepare the GAP analysis for Procurement deliverables that are delayed and providing the corrective action to address the delays.
- In-charge in the preparation of the FEED Weekly Progress Reports for Client submission.
- Prepare the FEED Monthly Progress Report for Client submission.
- Prepare and update the Critical Path Analysis for FEED Phase (as part of FEED Monthly Progress Report).
- Involve in the schedule preparation and updates of CAPEX Gates schedule.
- Participated in all Subcontractor Workshops Presentation for EPCI Schedule and Execution Strategy.
- Participated in Risk Workshops.
- Involve in the preparation and execution of the 1<sup>st</sup> EPCI Schedule Review Workshop.
- Prepare the MDR Mapping for Hull and Marine Engineering Deliverables (MODEC and COSCO) for EPCI Schedule development.
- Involve in the Preparation of EPCI Level 3 Schedule

**Hyundai Engineering and Construction Limited**

**May 2022 – Mar 2024**

**Position: Planning Engineer**

**Project: JFGP (Jafurah) Package 3 Construction, Saudi Arabia**

## **2. Planning Responsibilities**

- Preparation of Construction Schedule using Primavera P6.
- Worklist scoping and Package Preparation.
- Coordinate with Discipline Engineers in scheduling preparation and execution.
- Prepare Daily Progress Reports, Weekly Progress Reports and Monthly Progress Reports
- Assist in Progress Payment Preparation for Monthly Invoicing.
- Monitoring and Tracking of Progress and report directly to the Construction Manager.
- Prepare Look-Ahead Plans for Site Execution.

**Hyundai Engineering and Construction Limited**

**Dec 2016 – Apr 2022**

**Planning Engineer for Construction and Commissioning**

**Project: Al-Zour LNGI Project, Kuwait (USD2.79 Bn)**

## **1. Planning Responsibilities**

- Preparation of Method Statement for construction activities i.e., Deck Concrete Work, Pile Splicing, Pile Bent work, etc for submission and approval of client.
- Preparation and review of Lifting Plans, Method Statement and Risk Analysis
- Preparation and review of schedule for reclamation works i.e., dredging reclamation, vibro-flotation, layer compaction, rigid inclusion and revetment works.

## **2. Costing Responsibilities**

- Responsible for local contents cost stewardship and monthly expenditures reporting including participation in local contents quarterly audit.
- Preparation of monthly miscellaneous payment invoices for Marine Team

### **3. Project Management & Coordination**

- Preparation, consolidation, and review of all pre-qualification documents of all subcontractors Costing & Procurement
- Monitoring of sub-contracting qualification assessment and bidder list approval
- Review of Invitation to Bid packages submitted by qualified subcontractors.
- Coordination of pile damage repair at the trestle area which involves survey of all piles and preparation of report for pile damage repair works

### **4. Documentation**

- Preparation of Material Approval Request documents for submission and approval of client
- Preparation and submission of Monthly Progress Payment invoice for the Marine Team based on milestone achievements and approvals.
- Preparation of monthly progress report for change requests

**Bumi Armada Berhad**

**Jul 2015 – Jul 2016**

**Project: ENI-Angola 15/06 East Hub FPSO**

#### **Responsibilities:**

##### **Planning & Scheduling**

- Involve in the development of FPSO Schedule for bidding proposal, for FEED, Detailed Engineering, procurement and construction, onshore and offshore commissioning, and start-up.
- Progress monitoring, progress measurement and preparation of various types of reports such as weekly reports, monthly reports, S-Curve preparation, and Histograms.
- Scheduling and progress monitoring of FPSO installation and commissioning including preparation of mechanical completion documentation and system handover.

**ExxonMobil Asia Pacific PL**

**Dec 2012 – Jul 2015**

#### **Key Achievements / Project Involvements:**

##### **1. Turnaround Planner**

PAC Turnaround 2015, Ayer Chawan, Jurong Island, Singapore

##### **2. Turnaround Planner**

SCP Turnaround 2013, 100 Jurong Island Highway, Singapore

##### **3. Majors Planner**

MPHC Shutdown 2013, 18 Pioneer Road, Singapore

#### **Responsibilities:**

##### **Planning & Scheduling**

- Development of detailed Milestone Plan and Schedule
- Preparation of plans and schedules using Primavera 6
- Checking and updating of P6 plans submitted by Mechanical contractor
- Preparation of Plot Plans indicating the respective TAIDs for Piping

##### **Costing and Procurement**

- Development of detailed cost estimates and cost stewardship
- Ordering of Long Lead and Short Lead materials.
- Review and approval of cost estimates and bill of materials submitted by contractors.

- Raising of Purchase Requisition for Materials and Services thru Stripes/SAP.
- Preparation of budgetary cost estimates for approval of Change Requests.

#### **Documentation**

- Maintenance and update of Piping Work List.
- Consolidation of information specifically: P&IDs, Isometric Drawings, Bill of Materials, P6 Plans, Technical Specifications, Photos, Job Safety Analysis, Method Statements, Ventilation Plans, Rescue Plans, Lifting Plans and Management of Change for Job Package assembly.

#### **Project Management and Coordination**

- Communication with Operations, Inspection and Technical teams on scope clarification and alignment, painting requirements.
- Coordination with Logistics re: logistics requirements including Cranes.
- Site checks and work scoping with contractors for work scope clarity.
- Coordination with contractors, vendors for planning, execution, and pre-turnaround activities i.e., scaffolding erection, spool pre-fabrication, insulation removal, asbestos sampling and removal, spool pre-launching.

### **Foster Wheeler Asia Pacific Pte Ltd**

**Dec 2006 – Mar 2012**

#### **1. Senior Project Engineer**

Oct 2011 – Mar 2012

- Lanxess BTR Project  
Site: Lanxess BTR – Tembusu Road, Jurong Island, Singapore

#### **2. Project Engineer / Field Engineer**

Dec 2006 – Sept 2011

##### **Key Achievements / Project Involvements:**

- |                                                                 |                       |
|-----------------------------------------------------------------|-----------------------|
| ➤ FT Wax Expansion Project (Sasol, South Africa)                | Dec 2009 to Sept 2011 |
| ➤ Shell Bukom Turnaround TR3 (Pulau Bukom, SG)                  | Nov 2009 to Dec 2009  |
| ➤ Chevron Oronite Detergent Expansion Project (Pulau Sakra, SG) | Sept 2009 to Nov 2009 |
| ➤ Lucite Alpha 1 Project                                        | Sept 2009 to Nov 2009 |
| ➤ Exxonmobil Long Term Agreement (LTO)                          | Dec 2008 to Aug 2009  |
| ➤ LCO Onsite /Offsite Fluxing Project                           |                       |
| ➤ Alpha 1 Project – Lucite International                        | Sept 2007 – Sept 2008 |
| ➤ Novartis Singapore Pharmaceutical Mfg Project                 | Dec 2006 – Sept 2007  |

### **PPL Shipyard Pte Ltd**

**Jun 2006 – Dec 2006**

#### **1. Planning Engineer**

P2008 Project

#### **Responsibilities:**

- Preparation of Project schedule using Primavera 3.1
- Coordination of equipment delivery with all vendors involved in the project.
- Preparation of Monthly Progress Report for submission to the client.
- Monitoring and update of schedule.
- Coordination with client through fortnightly meetings and providing updates and clarifications on project details and engineering process.

### **Plant Engineering Construction Pte Ltd**

**Dec 1997 – Jun 2006**

#### **Project Engineer / Field Engineer**

##### **Project Involvements:**

- Exxonmobil SPA Debottleneck Project

- Exxonmobil Chemicals
  - SOP Turnaround 2005, Singapore
  - SAR De-mothballing Project, Singapore
  - SOP Commissioning, Start-up, and Maintenance
  - SOP Construction
- Shell MDS Re-construction Project, Bintulu, Malaysia
- Titan Cracker 2 Project, Pair Gudang, Malaysia
- SEA-OXO Project, Singapore

**Responsibilities:**

- Preparation of Method Statements, Job Safety Analysis (JSA), Ventilation Plans and Lifting & Plot plans.
- Perform coordinator role during shutdown between Mechanical and support groups (Insulation, Scaffolding, Painting & Civil).
- Coordination with ExxonMobil's Turnaround Planners for job package preparation.
- Site verification of all piping work list and tie-ins prior to scheduling and planning.
- Develop material control procedure for Turnaround Material Controlling
- Supervision of mechanical works (Piping & Reactors) during turnaround, mechanical piping activities i.e., Blinding & De-blinding, Spool re-instatement
- Preparation of Lifting Plans and Plot Plans for heavy lifts, spool removal and reinstatement.
- Preparation of tools and materials for mechanical works
- Supervision of furnace (AF40) maintenance works, piping and mechanical work during SOP turnaround.
- Preparation of permits during SOP turnaround
- Responsible for the flange policing team during SAR shutdown.
- Preparation of Auto-cad drawing using Auto-plant Software.
- Update and edit of construction drawings.
- Preparation and drawing of lifting plan for shutdown and turnaround works.
- Preparation of Bill of Materials
- Preparation and drawing of General Arrangement Drawings / P&IDs and Plot.
